

Vol	Page	Title / Keywords	
4004	324-334	<b>Title:</b>	<a href="#"><u>CircITGA7 regulates malignant phenotypes in bladder cancer cells via targeting miR-330-3p/KLF10 axis</u></a>
		<b>Keywords:</b>	<i>bladder cancer, circITGA7, KLF10, miR-330-3p, miRNA sponge</i>
	335-347	<b>Title:</b>	<a href="#"><u>LncRNA HOTTIP regulates TLR4 promoter methylation by recruiting H3K4 methyltransferase MLL1 to affect apoptosis and inflammatory response of fibroblast-like synoviocyte in rheumatoid arthritis</u></a>
		<b>Keywords:</b>	<i>HOXA transcript at the distal tip, mixed-lineage leukemia 1, promoter methylation, rheumatoidarthritis, toll-like receptor 4</i>
	348-359	<b>Title:</b>	<a href="#"><u>Evodiamine Inhibits EPRS Expression to Regulate Glutamate Metabolism and Proliferation of Oral Squamous Cell Carcinoma Cells</u></a>
		<b>Keywords:</b>	<i>evodiamine, glutamate metabolism, glutamyl-prolyl-tRNA synthetase 1 (EPRS), oral squamouscell carcinoma, proliferation</i>
	360-373	<b>Title:</b>	<a href="#"><u>Magnolin alleviated DSS-induced colitis by inhibiting ALOX5-mediated ferroptosis</u></a>
		<b>Keywords:</b>	<i>ALOX5, ferroptosis, inflammatory bowel disease, macrophages, Magnolin</i>
	374-383	<b>Title:</b>	<a href="#"><u>Performance of noninvasive seromarkers in predicting liver fibrosis among MAFLD patients with or without viral hepatitis</u></a>
		<b>Keywords:</b>	<i>APRI, FIB4, fibrosis, MAFLD, NFS</i>
	384-394	<b>Title:</b>	<a href="#"><u>Female Showed Favorable Left Ventricle Hypertrophy Regression During Post-TAVR Follow-up</u></a>
		<b>Keywords:</b>	<i>aortic stenosis (AS), echocardiography, sex differences, transcatheter aortic valvreplacement (TAVR)</i>
	395-403	<b>Title:</b>	<a href="#"><u>Surgical excision and radiotherapy for brain metastasis from colorectal cancer: how frailty and comorbidity indices influence outcome</u></a>
		<b>Keywords:</b>	<i>brain metastases, colorectal cancer, comorbidity index, modified frailty index, prognosticnutritional index</i>
	404-412	<b>Title:</b>	<a href="#"><u>Validating the Accuracy of the Hendrich II Fall Risk Model for Hospitalized Patients Using the ROC Curve Analysis</u></a>
		<b>Keywords:</b>	<i>fall risk assessment, falls, inpatients, receiver operating characteristic (ROC), the Hendrich II FallRisk Model (HIIFRM)</i>
	413-414	<b>Title:</b>	<a href="#"><u>A Case of Upper Gastrointestinal Bleeding Due to Pancreatic Pseudoaneurysm Rupture</u></a>
	415-416	<b>Title:</b>	<a href="#"><u>Hyperthyroidism After Radiofrequency Ablation for Thyroid Nodule</u></a>
