

Vol	Page	Title / Keywords	
4103	e12933	Title:	<u>Targeting SETDB1 in cancer and immune regulation: Potential therapeutic strategies in cancer</u>
		Keywords:	<i>cancer, endogenous retrovirus silencing, immune checkpoint blockage, methyltransferase, SETDB1</i>
	e12932	Title:	<u>Aptasensor-based point-of-care detection of cardiac troponin biomarkers for diagnosis of acute myocardial infarction</u>
		Keywords:	<i>acute myocardial infarction, aptasensor, biomarkers, cardiac troponins, point-of-care</i>
	e12936	Title:	<u>EZH2-mediated downregulation of miR-155-5p contributes to prostate cancer cell malignancy through SMAD2 and TAB2</u>
		Keywords:	<i>EZH2, miR-155-5p, prostate cancer, SMAD2, TAB2</i>
	e12943	Title:	<u>hnRNPA2B1 drives colorectal cancer progression via the circCDYL/EIF4A3/PHF8 axis</u>
		Keywords:	<i>circCDYL, colorectal cancer, EIF4A3, hnRNPA2B1, PHF8</i>
	e12934	Title:	<u>Telocinobufagin suppresses malignant metastasis of undifferentiated thyroid carcinoma via modulation of the LARP1-mTOR pathway</u>
		Keywords:	<i>anaplastic thyroid cancer, LARP1, malignant metastasis, mTOR, Telocinobufagin</i>
	e12940	Title:	<u>Effect of platelet-rich plasma and platelet-rich fibrin on healing of burn wound with dual-species biofilm</u>
		Keywords:	<i>bacteria, burn wound, dual-species biofilm, platelet-rich fibrin, platelet-rich plasma</i>
	e12942	Title:	<u>Hepatitis C virus-free endoscope procedures project: An in-hospital elimination approach</u>
		Keywords:	<i>care cascades, elimination, endoscopy, hepatitis C virus, hospital safety</i>
	e12937	Title:	<u>Dapagliflozin combined with metformin improves blood glucose, bone metabolism and bone mineral density in elderly patients with type 2 diabetes mellitus complicated with osteoporosis</u>
		Keywords:	<i>dapagliflozin, glycemic parameters, metformin, osteoporosis, type 2 diabetes mellitus</i>
	e12939	Title:	<u>Successful treatment of a mixed candidal and bacterial skull base osteomyelitis with antimicrobial agents and hyperbaric oxygen therapy—A rare case report</u>
