

Vol	Page	Title / Keywords	
4008	692-698	Title:	<u>Advances in Blood Biomarkers for Alzheimer Disease (AD): A Review</u> Keywords: <i>Alzheimer disease, blood test, blood-based biomarkers, diagnosis, plasma biomarkers</i>
	699-709	Title:	<u>circUQCRC2 promotes asthma progression in children by activating the VEGFA/NF-κB pathway by targeting miR-381-3p</u> Keywords: <i>childhood asthma, circUQCRC2, miR-381-3p, VEGFA/NF-κB</i>
	710-721	Title:	<u>HMGB1 inhibition blocks ferroptosis and oxidative stress to ameliorate sepsis-induced acute lung injury by activating the Nrf2 pathway</u> Keywords: <i>acute lung injury, ferroptosis, HMGB1, Nrf2, sepsis</i>
	722-731	Title:	<u>METTL3 aggravates cell damage induced by streptococcus pneumoniae via the NEAT1/CTCF/MUC19 axis</u> Keywords: <i>alveolar epithelial cells, LncRNA NEAT1, METTL3, MUC19, Streptococcus pneumoniae</i>
	732-743	Title:	<u>Gut microbiota-derived metabolite trimethylamine N-oxide aggravates cognitive dysfunction induced by femoral fracture operation in mice</u> Keywords: <i>inflammatory cytokine, postoperative cognitive dysfunction, quality of life, trimethylamine N-oxide, underlying mechanisms</i>
	744-756	Title:	<u>Identification of southern Taiwan genetic variants in thyroid dyshormonogenesis through whole-exome sequencing</u> Keywords: <i>congenital hypothyroidism, genetic variation, thyroid diseases, thyroid dyshormonogenesis, whole exome sequencing</i>
	757-765	Title:	<u>Development of diagnostic Support System for fibrosis of nonalcoholic fatty liver disease using artificial intelligence and deep learning</u> Keywords: <i>artificial intelligence, digital histopathology, liver fibrosis, NAFLD: nonalcoholic fatty liverdisease, steatohepatitis</i>
	766-767	Title:	<u>Coexisting cardiac disease and cervical spinal tuberculosis: Diagnostic challenges and treatment insights</u>
	768-769	Title:	<u>Rare cutaneous manifestation of zosteriform cutaneous metastases of lung cancer: two cases and literature review</u>
	770-772	Title:	<u>Glutamate concentrations related to depression and mania symptoms in patients with Graves' disease: A 1H-magnetic resonance spectroscopy study</u>

	773-774	Title: <u>Ultrasound-guided posterior lateral branches steroid injections of the sacral foramina for management of chronic new-onset sacroiliac joint pain after spinal fusion surgery: a prospective study of single-center in Vietnam</u>
