

TITLE INDEX**WILEY**

4-Phenylbutyric acid, a potent endoplasmic reticulum stress inhibitor, attenuates the severity of collagen-induced arthritis in mice via inhibition of proliferation and inflammatory responses of synovial fibroblasts 37:604

A

A tip of the iceberg: Disseminated plasmablastic lymphoma, diagnosed from a local oral lesion 37:346

A variable dimensional aerosol shield provides for perioperative COVID-19 patients 37:634

Acute generalized exanthematous pustulosis induced by hydroxychloroquine 37:1122

ADRM1 as a therapeutic target in hepatocellular carcinoma 37:47

An alarm system of carbamazepine-induced toxic effects highly associated with HLA-B*1502 allele 37:156

Analysis of overall survival in differentiated thyroid cancer patients with double primary malignancy 37:63

Apigenin suppresses proliferation, invasion, and epithelial-mesenchymal transition of cervical carcinoma cells by regulation of miR-152/BRD4 axis 37:583

Ascending myelopathy after intrathecal methotrexate 37:1018

Astragaloside alleviates alcoholic fatty liver disease by suppressing oxidative stress 37:718

Astragaloside IV alleviates lipopolysaccharide-induced preeclampsia-like phenotypes via suppressing the inflammatory responses 37:236

Astragalus polysaccharide ameliorates steroid-induced osteonecrosis of femoral head through miR-206/HIF-1 α /BNIP3 axis 37:1089

Autophagy and metabolism 37:12

Autophagy modulation as a potential targeted cancer therapy: From drug repurposing to new drug development 37:166

B

Balloon cell melanoma possessed the ability to develop BRAF V600E mutation in cancer cells 37:154

C

Cabin hospital for COVID-19 patients: Attention should be paid to hospital infection prevention, humanistic care, and privacy protection 37:739

CASC2 inhibits the growth, migration, and invasion of thyroid cancer cells through sponging miR-18a-5p/FIH1 axis 37:268

Characteristics of patients with hepatitis C virus infection and antiviral treatment initiation in Taiwan: The MOSAIC study 37:245

Cholecystoduodenal fistula: An uncommon cause of massive hemorrhage of upper gastrointestinal tract 37:436

Chondroitin sulfate modified and adriamycin preloaded hybrid nanoparticles for tumor-targeted chemotherapy of lung cancer 37:411

Cigarette smoke extract promotes DNA methyltransferase 3a expression in dendritic cells, inducing Th-17/Treg imbalance via the c-Jun/allograft inflammatory factor 1 axis 37:594

Circ_0000317/microRNA-520g/HOXD10 axis affects the biological characteristics of colorectal cancer 37:951

Circ_0087862 promotes the progression of colorectal cancer by sponging miR-142-3p and up-regulating BACH1 expression 37:1048

CircRNA ZNF609 promotes angiogenesis in nasopharyngeal carcinoma by regulating miR-145/STMN1 axis 37:686

Circular RNA circ_0011385 promotes cervical cancer progression through competitively binding to miR-149-5p and up-regulating SOX4 expression 37:1058

Circular RNA circRNA_101996 promoted cervical cancer development by regulating miR-1236-3p/TRIM37 axis 37:547

Circular RNA hsa_circ_0000730 restrains cell proliferation, migration, and invasion in cervical cancer through miR-942-5p/PTEN axis 37:964

Coagulation-related inflammatory pseudotumor of liver 37:528

Co-delivery of cisplatin and oleanolic acid by silica nanoparticles-enhanced apoptosis and reverse multidrug resistance in lung cancer 37:505

Comparison of laboratory data between children with COVID-19 and influenza 37:158

Comparison of the effect of ticagrelor combined with tirofiban versus clopidogrel combined with tirofiban on inflammation response and prognosis of patients with unstable angina pectoris in long term follow-up	37:1010
Critical functions of microRNA-30a-5p-E2F3 in cardiomyocyte apoptosis induced by hypoxia/reoxygenation	37:92
Cullin 4B regulates cell survival and apoptosis in clear cell renal cell carcinoma as a target of microRNA-217	37:121
Curcumin regulates EZH2/Wnt/ β -Catenin pathway in the mandible and femur of ovariectomized osteoporosis rats	37:513

D

De novo exon 18 G724S point mutation may be sensitive to Gefitinib	37:918
Decreased drug resistance of bladder cancer using phytochemicals treatment	37:128
Differentially expressed circRNA and functional pathways in the hippocampus of epileptic mice based on next-generation sequencing	37:803
Diffuse spleen calcifications in a patient with systemic lupus erythematosus	37:531
Downregulated microRNA-106 inhibits apoptosis and promotes proliferation and differentiation of chondrocytes in osteoarthritis through restraining the activation of Wnt/ β -catenin pathway	37:27
Downregulation of miR-29b-3p aggravates podocyte injury by targeting HDAC4 in LPS-induced acute kidney injury	37:1069
Downregulation of the long noncoding RNA <i>SNHG1</i> inhibits tumor cell migration and invasion by sponging miR-195 through targeting <i>Cdc42</i> in oesophageal cancer	37:181

E

Early diagnosis and treatment of anomalous origin of left coronary artery from pulmonary artery in an asymptomatic 1-month-old infant	37:922
Elevated serum miR-3129-5p contributes to the progression of coronary heart disease via targeting mTOR	37:314
Emergent bronchoscopic cryotherapy may safely cease invasive lung cancer induced massive endobronchial hemorrhaging in patients with high oxygen supply	37:833
Epidemiology, pathogenesis, diagnosis, surveillance, and management of hepatocellular carcinoma associated with vascular liver disease	37:355
Eradication of hepatitis C virus preserve liver function and prolong survival in advanced hepatocellular carcinoma patients with limited life expectancy	37:145
Eriodictyol attenuates TNBS-induced ulcerative colitis through repressing TLR4/NF- κ B signaling pathway in rats	37:812
Evolution of systemic treatment for advanced hepatocellular carcinoma	37:643
Exosomal CLIC1 released by CLL promotes HUVECs angiogenesis by regulating ITG β 1-MAPK/ERK axis	37:226
Exosomal microRNA-15a from ACHN cells aggravates clear cell renal cell carcinoma via the BTG2/PI3K/AKT axis	37:973
Exosomal NNMT from peritoneum lavage fluid promotes peritoneal metastasis in gastric cancer	37:305
Expression of apolipoprotein C1 in clear cell renal cell carcinoma: An oncogenic gene and a prognostic marker	37:419
Extremely rare case of retroperitoneal "ancient" schwannoma with significant cystic change embedded in the psoas muscle	37:632

F

Focal IgG4-related autoimmune pancreatitis mimicking pancreatic tumor	37:741
Formononetin exhibits anticancer activity in gastric carcinoma cell and regulating miR-542-5p	37:215

G

Gamma-glutamyl transpeptidase elevation is associated with metabolic syndrome, hepatic steatosis, and fibrosis in patients with nonalcoholic fatty liver disease: A community-based cross-sectional study	37:819
Genetic polymorphisms of regulatory T cell-related genes modulate systemic inflammation induced by viral hepatitis	37:1000
Granulomatous <i>Pneumocystis jirovecii</i> mimics pulmonary metastasis in rectal cancer	37:74

H

<i>Herp</i> knockout protects against nonalcoholic fatty liver disease in mice on a high fat diet	37:487
---------------------------------------------------------------------------------------------------	--------

Hsa-circ_0000064 accelerates the malignant progression of gastric cancer via sponging microRNA-621	37:841
Hypaphorine exerts anti-inflammatory effects in sepsis induced acute lung injury via modulating DUSP1/p38/JNK pathway	37:883
I	
Inhibition of miR-181a attenuates sepsis-induced inflammation and apoptosis by activating Nrf2 and inhibiting NF- κ B pathways via targeting SIRT1	37:200
Inhibition of suppressor of cytokine signaling-3 affects mesangial cell proliferation and cell cycle in mesangioproliferative glomerulonephritis	37:872
Inhibition of tripartite motif containing 26 inhibits non-small cell lung cancer cell growth	37:440
K	
Knockdown of long non-coding RNA RMRP protects cerebral ischemia-reperfusion injury via the microRNA-613/ATG3 axis and the JAK2/STAT3 pathway	37:468
Knockdown of miR-125b-5p inhibits the proliferation and invasion of gastric carcinoma cells by targeting RYBP	37:863
Knockdown of ZNF479 inhibits proliferation and glycolysis of gastric cancer cells through regulating β -catenin/c-Myc signaling pathway	37:759
L	
Late onset sudden cardiac death in Fabry disease	37:72
Level of Foxp3, DNMTs, methylation of Foxp3 promoter region, and CD4 + CD25 + CD127 ^{low} regulatory T cells in vulvar lichen sclerosis	37:520
Lichenoid sarcoidosis: An unusual variant of sarcoidosis	37:434
LINC01315 promotes the aggressive phenotypes of papillary thyroid cancer cells by sponging miR-497-5p	37:459
LncRNA CASC2 inhibits lung adenocarcinoma progression through forming feedback loop with miR-21/p53 axis	37:675
LncRNA CCAT1 downregulation increases the radiosensitivity of non-small cell lung cancer cells	37:654
LncRNA GAS5 inhibits the proliferation and invasion of ovarian clear cell carcinoma via the miR-31-5p/ARID1A axis	37:940
LncRNA H19 inhibits high glucose-induced inflammatory responses of human retinal epithelial cells by targeting miR-19b to increase SIRT1 expression	37:101
LncRNA NEAT1 promotes cell proliferation, migration, and invasion via the miR-186-5p/PTP4A1 axis in cholangiocarcinoma	37:379
LncRNA SNHG12 regulates the miR-101-3p/CUL4B axis to mediate the proliferation, migration and invasion of non-small cell lung cancer	37:664
LncRNA UCA1 negatively regulates NF- κ B activity in psoriatic keratinocytes through the miR125a-A20 axis	37:172
LncRNA TP73-AS1 regulates miR-495 expression to promote migration and invasion of nasopharyngeal carcinoma cells through junctional adhesion molecule A	37:361
LncRNA-GAS5 related to the processes of recurrent pregnancy loss by regulating Th1/Th2 balance	37:479
Long noncoding RNA SNHG3 promotes glioma tumorigenesis by sponging miR-485-5p to upregulate LMX1B expression	37:851
Long non-coding RNA-H19 promotes ovarian cancer cell proliferation and migration via the microRNA-140/Wnt1 axis	37:768
Lower growth arrest-specific 5 level in endometrium is related to endometriosis via promoting cell proliferation and angiogenesis	37:776
M	
Macrophages as a “weapon” in anticancer cellular immunotherapy	37:749
Mechanisms of immunogenic cell death and immune checkpoint blockade therapy	37:448
Metastasis of pulmonary adenocarcinoma to the thyroid closely mimics papillary thyroid carcinoma	37:831
MicroRNA-936/ERBB4/Akt axis exhibits anticancer properties of gastric cancer through inhibition of cell proliferation, migration, and invasion	37:111
MiR-10a-5p restrains the aggressive phenotypes of ovarian cancer cells by inhibiting HOXA1	37:276
MiR-128-3p alleviates TNBS-induced colitis through inactivating TRAF6/NF- κ B signaling pathway in rats	37:795

miR-140 inhibits osteogenic differentiation of human periodontal ligament fibroblasts through ras homolog gene family, member A -transcriptional co-activator with PDZ-binding motif pathway	37:38
MiR-146a functions as a potential tumor suppressor in retinoblastoma by negatively regulate neuro-oncological ventral antigen-1	37:286
MiR-149-3p can improve the osteogenic differentiation of human adipose-derived stem cells via targeting AKT1	37:1077
miR-188-5p inhibits proliferation, migration, and invasion in gallbladder carcinoma by targeting Wnt2b and Smad2	37:294
miR-330 alleviates dextran sodium sulfate-induced ulcerative colitis through targeting IRAK1 in rats	37:497
MiR-483-5p downregulation contributed to cell proliferation, metastasis, and inflammation of clear cell renal cell carcinoma	37:192
miR-671-5p repressed progression of papillary thyroid carcinoma via TRIM14	37:983
miRNA-10a-5p inhibits cell metastasis in hepatocellular carcinoma via targeting SKA1	37:784
Missed nursing care: An overview of reviews	37:82
M-Phase Phosphoprotein 9 upregulation associates with poor prognosis and activates mTOR signaling in gastric cancer	37:208

N

Nobiletin promotes the pyroptosis of breast cancer via regulation of miR-200b/JAZF1 axis	37:572
Notoginsenoside R1 alleviates high glucose-induced inflammation and oxidative stress in HUVECs via upregulating miR-147a	37:1101

O

Oncogenic miRNA-1908 targets HDAC10 and promotes the aggressive phenotype of cervical cancer cell	37:402
Overexpression of lncRNA-NEF regulates the miR-155/PTEN axis to inhibit adipogenesis and promote osteogenesis	37:930

P

Path from the discovery to the elimination of hepatitis C virus: Honoring the winners of the Nobel Prize in Physiology or Medicine 2020	37:7
Periprocedural transesophageal echocardiogram guide treatment of ablation catheter entrapment in the mitral valve	37:1124
Plasma miR-409-3p promotes acute cerebral infarction via suppressing CTRP3	37:324
Podocentric view of glomerular proteinuria: Focused on cytoskeletal changes and toward promising targeted therapies and challenges	37:539
Posaconazole-induced Pseudohyperaldosteronism	37:253
Potential of novel colchicine dosage schedule for the palliative treatment of advanced hepatocellular carcinoma	37:616
Prevalence and factors associated with suicide ideation and psychiatric morbidity among inpatients of a general hospital: A consecutive three-year study	37:427
Prognostic and clinicopathological significance of the platelet-to-lymphocyte ratio in melanoma: A meta-analysis involving 2099 patients	37:55
Pseudoxanthoma elasticum with null cell adenoma of the pituitary gland: A case report with multimodal imaging study	37:828

R

Real-world effectiveness of direct-acting antiviral agents for chronic hepatitis C patients with genotype-2 infection after completed treatment	37:334
Reduced serum miR-202 may promote the progression of Alzheimer's disease patients via targeting amyloid precursor protein	37:730
RNA methyltransferase NSUN2 promotes growth of hepatocellular carcinoma cells by regulating fizzy-related-1 in vitro and in vivo	37:991
S100P acts as a target of miR-495 in pancreatic cancer through bioinformatics analysis and experimental verification	37:562

S

Scissor-type knife stalk transection for a difficult-to-access pedunculated colorectal lesion	37:438
Secondary prevention of hepatitis B virus-related hepatocellular carcinoma with current antiviral therapies	37:262
Silencing of circ_0000517 suppresses proliferation, glycolysis, and glutamine decomposition of non-small cell lung cancer by modulating miR-330-5p/YY1 signal pathway	37:1027

Silencing of microRNA-3175 represses cell proliferation and invasion in prostate cancer by targeting the potential tumor-suppressor <i>SCN4B</i>	37:20
Skimmin protects diabetic cardiomyopathy in streptozotocin-induced diabetic rats	37:136
Sorafenib use in hepatitis B virus- or hepatitis C virus-related hepatocellular carcinoma: A propensity score matching study	37:894
SP1-induced lncRNA DANCR contributes to proliferation and invasion of ovarian cancer	37:371
Splenic aneurysm presented as gastric subepithelial lesion	37:1016
Statins, vascular calcification, and vitamin K-dependent proteins: Is there a relation?	37:624
T	
The association between oral health status and the clinical outcome of cirrhotic patients on the waiting list for liver transplantation	37:910
The depletion of Circ-PRKDC enhances autophagy and apoptosis in T-cell acute lymphoblastic leukemia via microRNA-653-5p/Reelin mediation of the PI3K/AKT/mTOR signaling pathway	37:392
The effects and mechanism of α -mangostin on chemosensitivity of gastric cancer cells	37:709
The emergence of a new cytokine storm during the COVID-19 pandemic: Multisystem inflammatory syndrome in children	37:255
The frustration intolerance of internet gaming disorder and its association with severity and depression	37:903
Tumor suppressor miR-192-5p targets TRPM7 and inhibits proliferation and invasion in cervical cancer	37:699
U	
Unilateral extensive purpura resulting from chronic iliofemoral deep venous thrombosis successfully treated by endovascular therapy with iliac vein stenting	37:920
Upregulation of long non-coding RNA myocardial infarction-associated transcription is correlated with coronary artery stenosis and elevated inflammation in patients with coronary atherosclerotic heart disease	37:1038
V	
Vitamin D has an effect on airway inflammation and Th17/Treg balance in asthmatic mice	37:1113
